LETTERS TO THE EDITOR

WHO WILL PAY?

[Back to the top](#)

Dear Editor,

I just read the attached article

http://www.worldoil.com/MAGAZINE/MAGAZINE_DETAIL.asp?ART_ID=3171

and I am shocked. Everyone at tomorrow night's meeting should read this -- factual and to the point.

The author concludes: "Less than one-third of wells are likely to be economic under current gas pricing scenarios....a terrible success rate...."

Who will pay to remove and clean up the more than 70% of wells that go out of business? Do you want one in your backyard? School yard? The operators will be long gone and the taxpayers may not be able clean up the mess or even sell homes on the real estate market.

I doubt if we would ever welcome a business into our town who had such a low success rate.

I will not be able to attend the meeting tomorrow night. Please take good notes and circulate this article to whomever you wish.

Thank you, Regards,
John Field, Bedford, TX

EDITORIAL

WI-FI FOR BEDFORD

By Stu Updike

[Back to the top](#)

It would appear from an article in the May 2007 issue of *Texas Town & City* magazine that adding a Wi-Fi network to Bedford would not only enhance our community's economic development, but save money and enhance the performance of the City's employees.

During the June 12 Council meeting, the Council discussed the establishment of a Wi-Fi mesh network throughout the City. Councilman Whistler said he thought it might be an aid to economic development, but Councilman Orea took the position that the decision should be driven by the City's need and that he did not feel the City had such a need. No action was taken.

One article in the magazine mentions the following cities that have installed Wi-Fi: Addison, Corpus Christi, El Paso and Lufkin. Addison was motivated to install Wi-Fi by the fact that there were areas within the city that had no Internet service. Corpus Christi saw the possible benefits of automated meter reading and of mobile work crews who could save time by interacting with the office via the Wi-Fi network. Lufkin has realized significant savings by eliminating the expensive T-1 lines and replacing their expensive phone system with a VoIP phone system.

Perhaps it would be wise to establish a group to study the benefits of Wi-Fi in greater detail.
